

**To help me provide a quick ballpark quote for you please do the following:**

Take a photo of your home so I can see the entire house, you may have to move way back to fit your home in the photo.

Here is an example.

This is a perfect photo of the back of the house. I'm able to see the entire house and the roof line.

With a photo like the one above I can then draw up a 3d model of your home as seen to the right.

To help me in the deck size, please select from one of the standard sizes in the deck examples PDF.

Or print out the graph paper and draw the custom deck shape you would like on your home. If you're good with the computer you can save the image and open this in Paint on your computer and draw what you like.

Once I have your information I can then give you a quick ballpark quote. If you like to move forward we can then set up a time for me to come out go over all your options, show some samples and give you that detail quote.

**Thank you for your time and consideration**
